"Is Your Home Senior Safe?"

Do you want to stay in your home for as long as you can? Is it as safe for you as it could be? Have you addressed any changes that may be needed?

We prize and enjoy our homes. Seniors today especially have the ability to stay healthy and happy in the home of their choice much longer than their predecessors but we have to look at them in an objective manner.

We have a program to help you with that. We can come in and assess your home from an objective perspective. We will make recommendations for improvements and either help you perform them or we can refer trustworthy professionals to come in and complete them for you.

There are also some programs in place to help with financing home renovations geared to help seniors Age in Place. Laila Pera of NSS addresses these in her article "Ageing in Place" available on the website – northgatesupportservices.ca

Get ahead now and call for a **FREE HOME SAFETY CHECK.**

Easy as 1, 2, 3!

1. Call or email Northgate Support Services and schedule a day for us to come in.
2. We will come in and look around your home with our safety checklist, make notes and then recommendations.
3. We will help you arrange for any necessary action.

*"We have time
for you."*
